

30<sup>th</sup> April 2019

**REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)**

**Statement of XL Precision Technologies Compliance with REACH and SVHC**

---

In no case are any products we manufacture made with a regulatory substance that is intended to be released, therefore we are exempt from REACH and SVHC and are, by default, in compliance with REACH and SVHC Regulations.

We have also confirmed this with the government body as it relates specifically to our products. According to the HSE, REACH applies to chemical substances of products ("articles") that release chemical or substance into the environment during their normal use.

REACH does not apply to solid, raw materials such as stainless steel or titanium alloys and other products in the form that we use them, or in our end products.

Therefore, our products are exempt from the REACH and SVHC requirements, according to the USA Federal and UK Government guidelines, and would therefore be in compliance with REACH and SVHC regulations.
